

OMOLOLA ALONGE

Junior Product Owner | Product Delivery | Agile Operations

Abuja, Nigeria | +234 703 477 6397 | lgeojeg@gmail.com | LinkedIn: linkedin.com/in/omolola-alonge-0908441b5

PROFESSIONAL SUMMARY

Agile product delivery professional with experience supporting the planning, documentation, and execution of digital products in remote environments. Skilled in translating business requirements into product features and functional specifications, collaborating with developers, and aligning business and technical stakeholders around clear delivery goals.

Experienced in supporting feature prioritization, product documentation, stakeholder communication, and digital platform delivery across music technology and data-focused roles. **Scrum Master Certified (SMC)** and currently pursuing **Scrum Product Owner Certified (SPOC)**, with a strong fit for junior Product Owner, Product Operations, and Agile Delivery roles.

CORE COMPETENCIES

Product & Agile: Requirements Gathering, Product Requirement Definition, Feature Definition, User Story Support, Feature Prioritization, Product Documentation, Agile & Scrum Methodology, Sprint Planning Collaboration, Agile Product Delivery

Stakeholder & Delivery: Stakeholder Communication, Stakeholder Collaboration, Cross-Functional Team Coordination, Remote Collaboration, Business Process Improvement

Analytics & Tools: Agile, Jira, Zapier Dashboard Reporting, Data Analysis, Power BI, Excel, SQL.

PROFESSIONAL EXPERIENCE

IT Project Manager / Product Delivery Lead | WyldPyth / 51 Lex Publishing & Distribution

Remote | Oct 2024 – Present

- Coordinate the development and delivery of digital products supporting music publishing and distribution operations in a remote team environment.
- Translate business requirements into product features and functional specifications for developers, improving clarity around scope, priorities, and expected outcomes.
- Act as a bridge between business stakeholders and technical teams to ensure clarity of requirements, resolve ambiguity, and keep product goals aligned throughout delivery.
- Support feature prioritization to ensure development remains focused on high-value deliverables aligned with business needs.
- Contribute to product and operational documentation for internal tools and digital platforms, improving execution clarity across delivery teams and stakeholders.

Junior Data Analyst | Bincom ICT Solutions

Remote | Nov 2023 – Sept 2024

- Analyzed large datasets to support business decision-making and provide actionable insights to internal stakeholders.
- Built dashboards in Power BI and Excel to improve reporting visibility and support data-informed operational decisions.
- Developed automated workflows that reduced manual reporting effort by approximately 30%, improving reporting speed and process efficiency.
- Structured data outputs and reporting artefacts in ways that improved clarity for non-technical users and decision-makers.

Junior Data Analyst | Digital Echoes (UK)

Remote | Feb 2022 – Aug 2023

- Performed data analysis and visualization to support client reporting, operational reviews, and strategic decision-making.
- Conducted exploratory data analysis to identify trends, patterns, and insights relevant to business objectives.
- Developed clear reporting outputs that improved communication between analytical workstreams and business stakeholders.

SELECT PRODUCT PROJECTS

FLAVA Artist Promotion Platform – Product Delivery Support

Supported development of a digital platform that enabled artists to share music across multiple streaming services through a unified fan link. Collaborated with developers to translate business needs into product features and helped keep delivery aligned with stakeholder goals.

ADM Challenge Website – Digital Competition Platform

Coordinated product requirements for a music competition platform designed to support artist submissions and audience engagement. Worked with developers to define functional features and support platform delivery.

Accounting Aggregation Software – Internal Financial Tool

Supported development of an internal financial tool designed to reconcile revenue data from multiple music distribution sources, improving financial visibility and operational tracking.
